

CLAIM AMENDMENTS

Amended claims: 1-10.

1. (Currently Amended)     A composition comprising an ethylene-propylene-diene rubber component; and  
a process oil having a kinematic viscosity at 100 °C greater than 8 cSt and a pour point of below 10°C wherein the process oil is obtained by a process comprising:  
                    ~~Use of a process oil having a kinematic viscosity at 100 °C greater than 8 cSt~~  
~~and a pour point of below 10 °C as obtained by~~
  - (a)        hydrocracking / ~~hydroisomerising~~ hydroisomerizing a feed comprising a Fischer-Tropsch synthesis product; ;
  - (b)        isolating from the product of step (a) a process oil precursor fraction; ; and
  - (c)        dewaxing the process oil precursor fraction obtained in step (b) to obtain the process oil, ~~optionally after separating a lower boiling fraction from said dewaxed product,~~  
~~as component in a composition comprising a ethylene-propylene-diene rubber component and the process oil.~~
2. (Currently Amended)     The composition of ~~Use of the process oil according to claim 1,~~  
wherein the process oil has a flash point of above 260 °C according to ISO 2592.
3. (Currently Amended)     The composition ~~Use of the process oil according to any one~~  
of claims 1-2, wherein the UV adsorption of the process oil at 300 nm is less than 0.6% according to ASTM D 2008-A1.
4. (Currently Amended)     The composition ~~Use of the process oil according to any one of~~  
claims 1-3, wherein the evaporation loss of the process oil at 107 °C during 22 hours is less than 0.05 wt% according to ASTM D 972.
5. (Currently Amended)     The composition ~~Use of the process oil according to any one of~~  
claims 1-4, wherein the kinematic viscosity at 100 °C greater than 9 cSt.

6. (Currently Amended)     The composition ~~Use of the process oil according to any one of claims 1-5,~~ wherein step (c) is performed by solvent dewaxing.

7. (Currently Amended)     The composition ~~Use of the process oil according to any one of claims 1-5,~~ wherein step (c) is performed by catalytic dewaxing.

8. (Currently Amended)     The composition ~~Use of the process oil according to any one of claims 1-7,~~ wherein the conversion in step (a) is between 25 and 65 wt%.

9. (Currently Amended)     The composition ~~Use of the process oil according to any one of claims 1-8,~~ wherein the composition furthermore comprises a poly-olefin component.

10. (Currently Amended)     The composition of ~~Use of the process oil according to claim 9,~~ wherein the poly-olefin is polypropylene
